

Environmental policy statement

Cryptofintech Limited is a professional and environmentally conscious organisation, which acknowledges from the outset the impact that our operations may potentially have on the environment.

The clear and present dangers of climate change, environmental pollution and a decline in biodiversity require proactive responses at every level. We need to find a new, sustainable path to the future we want to live in.

Cryptofintech will make consideration for the environment an integral part of our work. This means making sure that all aspects of what we do such as policies, plans, practices and procedures, reflect and incorporate environmental objectives and targets where appropriate.

Responsibility for promoting, implementing and reviewing our policy rests first with the company directors. They must ensure that environmental issues are given adequate consideration in the planning and day-to-day supervision of all work.

In pursuance of our policy the objective is to minimise any impact on the environment by:

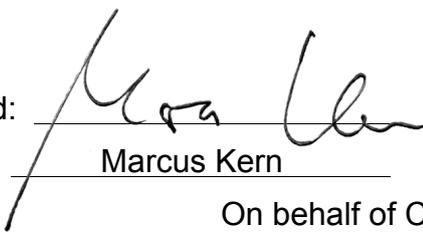

1. Preventing pollution, reducing waste and ensuring wherever practicable, that measures are implemented to protect and preserve natural habitats, biodiversity and climate.
2. Considering the effects that our operations may have on the local community.
3. Taking action to eliminate or reduce, as far as practicable, any potentially adverse environmental impacts.
4. Working towards a sustainable mitigation and adaptation of climate change.
5. Using energy and water resources more efficiently.
6. Promoting environmental awareness amongst our contractors, suppliers and partners by implementation of operational procedures.
7. Periodically reviewing our policy and procedures to ensure they are compliant with:
 - all relevant EU and UK legislation,
 - the Cornwall Environmental Growth strategy
 - Article 8 (Sustainable development) of the Common Provisions Regulation.
8. Ensure effective and appropriate monitoring and reporting of environmental policy matters.

Cryptofintech will take all practical steps to ensure that potential hazards and risks to the environment are identified and that suitable and effective preventive and control measures are implemented. Cryptofintech will provide sufficient resources, equipment, information, instruction and training to plan, carry out, monitor and review this policy.

The operation of this policy and the associated procedures will be monitored and reviewed on a regular basis to ensure that they remain current and applicable to the company's activities.

We will annually review how our policy has been working and make alterations or additions to our policy as necessary to ensure that it remains current and applicable to the company's activities. We will produce an **Environmental Action Plan** that will detail the specific measures that Cryptofintech will take to implement and monitor our policy, which will also be reviewed annually.

This policy has been endorsed by the board of directors which gives its full support to its implementation.
